

TABEL CU LUCRARILE ACCEPTATE PENTRU CNAE 2014

Nr. Crt.	Secțiunea	ID	Titlul lucrării	Prim autor	Co-autori
1.	S 1	82	Researches regarding the factory test of electric high-duty and high voltage equipment.	Aurel Campeanu	Gh. Liuba I. Piroi L. Augustinov E. Spunei
2.	S 1	83	Comparative FEM-based Analysis of Multiphase Induction Motor	Leonard Livadaru,	C. Nuțescu, A. Munteanu, A. Simion, M. Cojan
3.	S 1	4	Influence of Starting Cage Material upon Dynamic Behaviour of Reluctance Synchronous Motors	Sorin Enache,	A. Campeanu, I. Vlad, M.A. Enache
4.	S 1	6	Influence of Stator Winding Resistance upon Maximum Torque of Reluctance Synchronous Motors	Monica-Adela Enache,	Gh.E. Subțirelu, N. Boteanu, M. Dobriceanu
5.	S 1	5	Utility of Numerical Methods in Establishing Performances of Low Power Synchronous Motors	Ion Vlad	A. Campeanu, S. Enache, M.A Enache
6.	S 1	3	The Hermetic Synchronous Engines for Pumping the Aggressive Liquids	Tudor Ambros	M. Burduniuc
7.	S 1	9	Investigation on self-organization processes in DC generators by synergetic modeling	Ion Voncilă	M. Costin R. Buhosu
8.	S 1	72	Teaching platform for DC electric drives	Ioan Dragoș Deaconu	A.I. Chirilă, V. Navrapescu, A.S. Deaconu
9.	S 1	73	Rotor pole pitch factor influence on the operation parameteres of a 9/10 pole permanent magnet synchronous machine	Florin Lazar	A. Simion, L. Livadaru, O. Dabija

10.	S 1	64	Application of Finite Element Method to Determine the Performances of a Permanent Magnet Synchronous Motor for Driving a Bicycle	Nicolae Diga	C. Ghiță, S. M. Diga, D. Constantin, M. Brojboiu
11.	S 1	81	Practical Platform for Open and Closed Loop Speed Control of an Inverter Driven Asynchronous Machine Used for Teaching Purposes	Dan Claudiu Rus	Șt. Matis, I. I. Incze, I. Birou
12.	S 1	69	New Adaptive Observer for Sensorless Induction Motor Drives	Olimpiu Stoicuta	T. Pană
13.	S 1	14	Topology Optimization of Switched Reluctance Motors to Increase Energy Efficiency	Ion Voncilă	R. Buhosu, M. Costin
14.	S 1	68	On the Magnetic Flux Density Analytical Calculation in the Air-Gap of Electric Machines with Wide Open Slots	Alina Cristina Viorel	I. A. Viorel, L. Strete
15.	S 1	58	Current state of research at the EMAD Research Centre from „Ștefan cel Mare“ University in connection with actuators and solar motors with solid heating medium	Adrian- Neculai Romanescu	O. M. Țanța, M. Poienar, I. Nițan, C. Ungureanu, L. Mandici, D. Cernomazu
16.	S 1	60	Contributions Concerning the Clock Hour Figure Utilization for the Power Transformer Diagnostic	Cristina Prodan	M. Poienar, O. M. Țanța, A. N. Romanescu, D. Ș. Georgescu, D. Cernomazu
17.	S 1	57	Considerations Concerning Matrix Diagram Transformations Associated with Mathematical Model Study of a Three-phase Transformer	Mihaela Poienar	D. Șt. Georgescu, O.M. Țanța, Nițan I., E.D. Olariu, D. Cernomazu
18.	S 1	56	Particular Matrix in the Study of the Index Hour Mathematical Model	Mihaela Poienar	D. Șt. Georgescu, O. M. Țanța,

					I. Nițan, E.D. Olariu, D. Cernomazu
19.	S 1	26	Considerations Regarding the Oportunity of Using Psychological Techniques to Stimulate Solutions Characterized by Novelty and Inventive Step in TISR Transformers and Electric Motors with Shorted Moving Coil	Georgescu Daniel □tefan,	Poienar M., □an□ a O.M., Romanescu A.N., Olariu E.D., Cernomazu D.
20.	S 1	27	Contributions to the Transient Study of an Electric Motor with Shorted Moving Coil	Georgescu Daniel	I. Ni□ an, O. □an□ a, M. Poienar, D. Cernomazu
21.	S 1	59	New Sspects Concerning the CEUS Figures Identified at Ferrofluid Utilisation in Rotating Magnetic Field	Ovidiu Magdin Țanța,	M. Poienar, A.N. Romanescu, M.B. Negru, D. Cernomazu
22.	S 1	89	A MATLAB graphical user interface dedicated to the optimal design of the high power induction motor with heavy starting conditions	Maria Brojboiu	V. Ivanov
23.	S 1	92	Modernization of the Grinding Electromechanical Drive System of the Automated Coffee Machine	Ilie Nuca	A. □ urcanu
24.	S 1	95	On The Optimal Selection of Electrical Machines Fans	Mădălin Costin	I. Dobrotă, I. Voncilă, M. Oancă
25.	S 1	96	Alternative Design Relationship of Inner Diameter for Fault Approach of Salient Poles Synchronous Machine	Ion Dobrota	M. Costin, I. Voncilă, M. Oancă
26.	S 1	90	Assessment of Electromagnetic Stress in a Permanent Magnet Synchronous Machine with Commutable Poles	Mădălin Costin	I. Dobrotă, I. Voncilă, I. Paraschiv
27.	S 2	70	D.c.-d.c. converter controlled by optic fiber channels.	Marinel Popescu	C. Cărămidă C. Boltașu

28.	S 2	36	dSPACE Implementation of the Third Harmonic Insertion based Modulation on the Three Phase Power Inverter	Marian Gaiceanu	C. Nichita
29.	S 2	16	The Use of Current Generators in Electrical Converter Drives for Stepper Motors	Emanoil Toma	-
30.	S 3	75	The command by GSM for positioning systems of anti-hail ramps	Gheorghe Manolea	F. Ravigan A. Novac
31.	S 3	2	Control System for Producing Electricity with Dual Stator Winding Cage-Rotor Induction Generator	Lucian Nicolae Tutelea,	S. I. Deaconu, G. N. Popa
32.	S3	79	Speed Digital Control of Brushless DC Motor Using dsPIC Controller	Gheorghe Băluță	Gh. Ursanu
33.	S3	87	Command and running of an experimental model vehicle for covering a labyrinth type runway	Eugen Răduca	A. F. Păun, M. Răduca, C. Hațiegan, S. Drăghici, C. Rudolf, L. Căndea
34.	S3	65	A Solution to Study Different Homing Methods Using a PLC	Mihai Rață	A. Graur, L. Mandici, G. Rață
35.	S3	61	The command of the flour transport pumps in a cereal mill with PLC Siemens S7-1200	Eugen Răduca	M. Schmidt, S. Ungureanu, M. Răduca, C. Hațiegan, N. Pop, F. Novăcescu
36.	S3	91	Design and Control of the Electric Drive of the Anti-Hail Launching System	Gheorghe Manolea	S. Ivanov, L. Alboteanu, C. Șulea, □t. M. Nicolae
37.	S3	15	Some Aspects Regarding the Use of Digital Signal	Emanoil	-

			Controllers in Electrical Drivers for Stepper Motors	Toma	
38.	S3	97	Design and Control of the Swing Gates with Implementation of Multiple Command Systems	Ciprian Afanasov	L. Mandici, M. Rață
39.	S3	98	Regarding the NVH behavior of the more electric vehicles. Study case of a small PM motor	Florin Lazăr	D. Lucache, A. Simion, P. N. Borza, L. Livadaru
40.	S 4	18	Optimal control of an electrical drive system with variable torque	Corneliu Boțan	F. Ostafi
41.	S 4	84	Study on the identification of an actuator	Ioan Ruja	E. Spunei C. Marta I. Piroi M. Roșu
42.	S 4	46	Flywheel Energy Storage Drive System for Wind Applications	Marius C. Georgescu	-
43.	S 4	8	A New Method of Modeling The Hybrid Stepper Motor and Simulation Sequences Control	George Mihalache	Gh. Livinț, P. Stan
44.	S 4	35	Current Control of the Single-Phase Full-Bridge Power Inverter	Marian Gaiceanu	R. Buhosu, G. Gurguiatu, C. D. Balanuta
45.	S 5.1	33	Integrated Photovoltaic System Used as an Alternative Power Source	Laurențiu Alboteanu	Gh. Manolea F. Ravigan
46.	S 5.1	49	System for Monitoring and Analysis of Vibrations at Electric Motors	Gabriela Rață	M. Rață
47.	S 5.1	71	A.c. Power Measurement Using Power Analyzer Associated with External Transducers. Accuracy and Uncertainty Evaluation.	Marinel Popescu,	C. Dobrea, Șt. Șeitan
48.	S 5.1	37	On-line Identification of the DC motor Parameters by using Least Mean Square Recursive Method	Marian Găiceanu	R. Șolea, B. Coders, C. Eni
49.	S 5.1	7	Monitoring system dynamic regimes with variable reluctance synchronous motors	Gheorghe-Eugen	M. Dobriceanu, A. M. Enache,

				Subțirelu	N. Boteanu
50.	S 5.1	93	Diagnosis System for Elements Power Rectifiers	Virginia Ivanov	M. Brojboiu, S. Ivanov
51.	S 5.1	94	Reliability Evaluation of Electrical Networks	Victor Popescu	-
52.	S 6.1	25	Power System Restoration with Black-Start Pump Storage Power Plants	Walter Sattinger	-
53.	S 6.1	48	Improving Compensation Performance in Three-Phase Active Power Line Conditioners by DC-Voltage Control	Mihaela Popescu	M. Dobriceanu Gh. Oprea
54.	S.6.1	67	Considerations on Numerical Protections for Induction Motors Connected in MV Industrial Power Systems	Gheorghe Hazi	A. Hazi
55.	S.6.1	86	Calculation of Industrial Power Systems Containing Induction Motors	Gheorghe Hazi	A. Hazi
56.	S.6.1	55	Evaluation of Current Control Methods in Three-Phase Shunt Active Power Filters System	Constantin Vlad Suru,	M. Linca, C.A. Patrascu
57.	S.6.1	34	Technical and economic analysis of softstarter use in low voltage networks	Virgil Maier	S. Gh. Pavel I. Birou H. Gh. Beleiu
58.	S.6.1	47	High Performance Shunt Active Power Filter: Design Consideration and Experimental Evaluation	Alexandru Bitoleanu	M. Popescu, C.V. Suru
59.	S.6.1	88	Gas Boiler Powered by the Fuel Cell System	Nicolae Badea	M. Costin
60.	S.6.1	39	Determination Of The Level Of Influence Of Various Factors On The Reliability Of Power System	Victor Popescu	-
61.	S.6.2	63	Retention of powders from flue gases resulted from the combustion of lignite in high energy boilers in thermal power stations	Ion Teodor Ciochiu	V. Osiac, B. Huza, Gh.M. L. Ciurezu, A.M.Mousavi
62.	S.6.2	32	Improving Filter Performances for Conducted Electromagnetic Interferences Suppression	Adina Răcășan	C. Munteanu, V. Topa, C. Păcurar,

					C. Hebedean
63.	S.6.2	85	Powder collection from flue gases resulting from the burning of lignite in boilers from high power energy power plants	Ion Teodor Ciochiu,	V. Osiac, A.M. Mousavi, B. Huza, L. Gh. M. Ciurezu
64.	S.6.3	76	Calculation of control circuits in time domain using Scilab/ Xcos environment	Petru Chioncel	S. Drăghici C.P. Chioncel
65.	S.6.3	77	Calculation of control circuits in frequency domain using Scilab environment	Petru Chioncel	E. Spunei C.P. Chioncel
66.	S.6.3	78	The Role of Mentoring in Entrepreneurship Training. PREMIO Case Study	Nicoleta Gillich	C.P. Chioncel
67.	S.6.3	51	A review of the influence factors on solar photovoltaic (PV) systems	Cristian Chioncel	L. Augustinov, V. Nedelea
68.	S.6.3	10	Optimizing Street Lighting Systems Design	Elisabeta Spunei	I. Piroi, F. Piroi
69.	S.6.3	11	Notes on LED Installations in Street Illumination	Elisabeta Spunei	I. Piroi, F. Piroi
70.	S.6.3	31	Educational approach to information transmission channels of data from two different viewpoints: combinatorial and probabilistic	Silviu Draghici	C.V. Anghel Drugarin, A. A. Minda, M. Raduca, E. Raduca
